Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group 1, species 1, claims 1-6 and 11-17 in the reply filed on January 16, 2007 is acknowledged. The traversal is on the ground(s) that the examination of the entire application can be made without serious burden on the examiner. This is not found persuasive because applicant has not provided any evidence on why it would not be a serious burden, applicant merely concludes that no serious burden exists, while in fact, different class and subclass are required to search in order to exam group I and II and all of the species.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 7-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on January 16, 2007.

Claim Objections

3. Claim 3 is objected to because of the following informalities: "left and right arm portions" in lines 2-3 should be "left and right arm members" in order to be consistent with the language as recited in line 7. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3616

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 5, 11 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Toyoda (U.S. 6,691,814).

Toyoda discloses a structure for installing a rear cushion in a rear suspension, comprising: a rear swing arm (24), a front end of which is supported so as to be freely rock-able on a vehicle body side through a pivot shaft (25), and a rear wheel (26) of which is supported at a rear end; a cushion bracket (31) provided on a upper portion of said rear swing arm (24) on a front end side; a link (32) for coupling a lower front end portion (33) of said rear swing arm (24) to the vehicle body side (13); and an upper portion (61) of said rear cushion (28) supported by said cushion bracket (31), and a lower portion (62) of said rear cushion (28) supported by said link (32), wherein said cushion bracket (31) extends forwardly of and rearwardly of the upper portion of said rear cushion (figure 2 shows the side view of the rear suspension, wherein the shock absorber fitting beam 31 is mounted to the upper front portion of the swing arm 24 and extended in longitudinal direction, wherein the front end and rear end of the shock absorber fitting beam are located forward and rearward with respect to the upper portion 61 of the shock absorber 28), both a forward end portion and a rearward end portion of the cushion bracket (28) are coupled to said rear swing arm (24), and wherein the upper portion (61) of said rear cushion (28) is supported by an intermediate portion (see figure

Art Unit: 3616

2) of the cushion bracket in a back-and-forth direction; wherein the link includes a triangular shaped link member (32) and a linear link arm (34); wherein the rear cushion includes a cushion spring (shock absorber 31 is a cushion spring).

Allowable Subject Matter

6. Claims 2-4, 6, 12-13, and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
